ARITHMETIC OPERATORS

Assignment

Operators	What does it do?
=	Initialize or change the value of a variable.

Arithmetic

Operators	What does it do?
+	Addition
-	Subtraction
*	Multiplication
/	Division
**	Exponentiation
%	Modulo
+=	Plus-Equal (*Increment a variable.*)
-=	Minus-Equal (*Decrement a variable.*)
*=	Times-Equal (*Multiply a variable.*)
/=	Slash-Equal (*Divide a variable.*)
%=	Mod-Equal (*Remainder of dividing a variable.*)

Bitwise

Operators	What does it do?
<<	Bitwise Left Shift
<<=	Left-Shift-Equal
>>	Bitwise Right Shift
>>=	Right-Shift-Equal
&	Bitwise AND
&=	Bitwise AND-Equal
|	Bitwise OR
|=	Bitwise OR-Equal
~	Bitwise NOT
^	Bitwise XOR
^=	Bitwise XOR-Equal

Logical

Operators	What does it do?
!	NOT
&&	AND
||	OR

Miscellaneous

Operators	What does it do?	Example
,	Comma Separator	((a=1,b=2,c=3))
